The Massachusetts Historical Commission (MHC) has converted this paper record to digital format as part of ongoing projects to scan records of the Inventory of Historic Assets of the Commonwealth and National Register of Historic Places nominations for Massachusetts. Efforts are ongoing and not all inventory or National Register records related to this resource may be available in digital format at this time.

The MACRIS database and scanned files are highly dynamic; new information is added daily and both database records and related scanned files may be updated as new information is incorporated into MHC files. Users should note that there may be a considerable lag time between the receipt of new or updated records by MHC and the appearance of related information in MACRIS. Users should also note that not all source materials for the MACRIS database are made available as scanned images. Users may consult the records, files and maps available in MHC's public research area at its offices at the State Archives Building, 220 Morrissey Boulevard, Boston, open M-F, 9-5.

Users of this digital material acknowledge that they have read and understood the MACRIS Information and Disclaimer (<http://mhc-macris.net/macrisdisclaimer.htm>)

Data available via the MACRIS web interface, and associated scanned files are for information purposes only. THE ACT OF CHECKING THIS DATABASE AND ASSOCIATED SCANNED FILES DOES NOT SUBSTITUTE FOR COMPLIANCE WITH APPLICABLE LOCAL, STATE OR FEDERAL LAWS AND REGULATIONS. IF YOU ARE REPRESENTING A DEVELOPER AND/OR A PROPOSED PROJECT THAT WILL REQUIRE A PERMIT, LICENSE OR FUNDING FROM ANY STATE OR FEDERAL AGENCY YOU MUST SUBMIT A PROJECT NOTIFICATION FORM TO MHC FOR MHC'S REVIEW AND COMMENT. You can obtain a copy of a PNF through the MHC web site (www.sec.state.ma.us/mhc) under the subject heading "MHC Forms."

AREA FORM

ARCHITECTURAL DESCRIPTION ☒ *see continuation sheet*

Describe architectural, structural and landscape features and evaluate in terms of other areas within the community.

The area of Cordaville is bounded on the east by the house at 65 Southville Road, on the north by the house at 269 Cordaville Road, on the west by 95 Southville Road and on the south by the foundation ruins of the former Cordaville Woolen Company. The village of Cordaville is primarily a residential neighborhood with buildings from the Early Industrial, Late Industrial and Early Modern Periods. The residences are mostly detached, wood-frame structures between 1 1/2 and 2 1/2 stories in height. They retain integrity of design, location, setting and association and are evocative of a typical historic worker village. Some buildings have modern replacement materials on the exterior. These are generally asphalt roofing and vinyl clapboard. Greek Revival, Second Empire, Victorian Eclectic and other design elements are present in the area. The current focus of the neighborhood is the corner of Southville and Cordaville roads and the Early Industrial and Late Industrial residential subdivisions north of Southville Road. Some of the buildings have been sided with vinyl clapboards, some windows have been replaced and the condition of the buildings is fair to good.

There are six residences of note on the north side of Southville Road between North Street and Woodbury Road. **Nos. 65, 67, 73, and 75 Southville Road** are jerkinhead gable front, two-story, two-bay Colonial Revival houses. No. 75 is the best preserved and has shouldered hood moldings over the first and second story 6/6 double hung sash on the facade and on the east side wall. The ogee arch over the recessed entry has been covered by a gable-roof entry porch. The walls are clad in wood clapboard and the roof is clad in asphalt shingles. **Nos. 71 and 69 Southville Road** are two-story, two-bay, gable-front Gothic Revival residences with ogee arches over the recessed entries and shouldered hood moldings over the windows. Building materials include wood clapboard and wood shingle, vinyl and asbestos siding. Roofs are clad in asphalt shingle and foundations are built of concrete. The houses are in poor to good condition.

HISTORICAL NARRATIVE ☒ *see continuation sheet*

Explain historical development of the area. Discuss how this area relates to the historical development of the community.

The village of Cordaville was one of two mill villages established in response to the construction of the Boston and Albany Railroad in Southborough in the early 1830s. Other factors encouraging settlement were the influx into the region of immigrants and the presence of water power. The combination of transportation opportunities, human migration, and technological and industrial developments resulted in the creation of a core population and employment area for many newly arrived Irish residents.

A railroad depot was erected in the village of Southville a mile to the east of Cordaville in approximately 1835. It was located at the southwest corner of the railroad and Parkerville Road. This is the building currently located at **260 Parkerville Road**, which was moved north of Southville Road in 1906. Cordaville was connected to the town center to the north by Cordaville Road after the arrival of the railroad and, in 1846, Milton Sanford built a cotton and woolen mill south of the railroad opposite the southern end of Parker Street in the village he named for his wife, Cordelia. The buildings burned in 1855 but were rebuilt within three years, and produced wool blankets for the Union Army during the Civil War. Sanford sold to the Cordaville Mills Company in 1864. Adolphus Merriam of Framingham bought the mill in 1869 and sold it to the Cordaville Woolen Company in 1876, which operated the facility until 1926, at which time the mill ceased operation. It reopened in 1928 under the ownership of Bernie Cotton of Worcester who produced shoddy, or woolen products made from reclaimed material, into the 1930s. Sanford built the multiple-unit dwellings at **6, 8, and 10 Parker Street** and the single-unit dwellings at **3, 5, 7 and 9 Cottage Street** for his employees in the 1840s. These residences continued to be associated with the mill complex until at least 1926. CONTINUED

Form No.

ARCHITECTURAL DESCRIPTION:

The former site of the Cordaville Woolen Company is south of the railroad and west of Route 85. This was a three-story, gable-front building fourteen bays deep with an ornamental tower and several large outbuildings. There was also a stable, a creamery and rail-related structures at the corner of Route 85 and Southville Road. The last of these industrial structures was torn down in the 1970s and very little remains to indicate their presence except foundation ruins. **Eighty-one Southville Road** is at the corner of North Street. It is a five-by-three bay, 2 1/2-story wood-frame residence with little ornament. There are two sheds attached at the north side wall. Original windows have been replaced. The building is sided in wood clapboard. A second entry at the south-facing gable end is flanked by transom and sidelights. It is in fair to good condition and retains some integrity of design and association.

Nos. 9, 7, 5, and 3 Cottage Street are identical, two-by-two bay, 1 1/2-story gable-front residences. All have one-story bay windows and 3 Cottage Street has a one-story, shed-roof porch attached to the facade. There is little ornament on any of the houses. Building materials consist of asphalt roof shingles and vinyl and wood clapboard siding. Windows were originally 2/2 double-hung sashes and some have been replaced. Side ells are attached to Nos. 5, 7 and 9. There are garages associated with 3, 5 and 7 Cottage Street. Additions have been made to 3 and 9 Cottage Street. The east end of Cottage Street is the site of a two-story, two-by-two bay Italianate residence with side and rear ells. It has a pyramidal hip roof, a one-story shed roof porch and asbestos siding. Ornamental elements include paired brackets at the eaves of the house and the porch. Windows are 6/6 double-hung sashes. Buildings on Cottage Street retain some integrity of design and craftsmanship and constitute a cohesive neighborhood of former worker housing.

Parker Street is the location of three side-gable, two-story, six-by-two bay residences. Entry porches are present at **6 and 10 Parker Street**. There are an attached garage at 10 and a side ell at **8 Parker Street**. Ornamental elements that survive on no. 10 include corner boards, a wide cornice with gable returns and simple window surrounds. The houses at 6 and 8 Parker Street have been resided and no longer have these elements. Windows on no. 10 are 6/6 double hung sashes and others are 2/2 double hung sashes. Entries are unornamented and covered by entry porches. Six Parker Street is clad in vinyl, no. 8 is clad in asbestos clapboard and no. 10 is clad in wood clapboard. All have slate shingle roofs. Foundations are uncut stone. The integrity of the materials on the houses on Parker Street has been compromised, but its associations with Early Industrial period worker neighborhoods remain.

The railroad bridge over Route 85 is a simple-span, riveted steel half-through plate girder. It is approximately 30' long, 25' wide and 12' over the level of the road. Depth of the solid built girders is approximately four feet. The unballasted floor system is supported by riveted steel stringers and railroad tie beams are placed less than six inches apart. The abutments are built of random coursed granite ashlar.

HISTORICAL NARRATIVE:

The former company store and meeting hall were located in the building at **110 Southville Road**, which was built around 1850 and continues to be used as a store. In 1870, the Wright Brothers occupied the store and operated the post office in the building. Francis Wright, a resident of Fayville, was listed in the resident directories as a dealer in groceries and dry goods as late as 1900. Wright continued to operate the store into the twentieth century and became postmaster during that period. The railroad crossing south of the store was repositioned 0.1 miles to the east around the turn of the twentieth century. A plate-girder bridge and a new segment of road were constructed at that time.

By 1870, there were freight houses, a storehouse, mill offices, a second store, boarding house and a depot clustered around the junction of Cordaville Road, Southville Road and the Boston and Albany Railroad. At this time, the villages of Cordaville and Southville were similar in density of development and levels of commerce and industry. A group of six Gothic Revival residences was constructed east of the village center on the north side of Southville Road by 1870. **Nos. 65-75 Southville Road** were probably used as tenements. Daniel W. Mitchell, the railroad station agent at Cordaville, probably lived at the corner of Parker and Hammond streets in a house that is no longer standing. He may have rented out his property at **71 Southville Road**, as he was listed as the owner of both houses. Adjacent houses on Southville Road were owned individually and not by the Cordaville Woolen Company. J. W. Hammond lived at **14 Parker Street** from at least 1870 until 1900. He was employed as a machinist in Cordaville. The house at **81 Southville Road** was occupied by a carpenter and joiner named Charles Wood in 1870 and by his heirs in 1898. During the Early and Late Industrial periods, Cordaville supported expanding mill operations of the Cordaville Woolen Company, freight storage facilities of the Boston and Albany Railroad, and several retail sales establishments. There were rental properties, a Catholic Church, schools and small industrial operations in increasing numbers throughout the period. The predominant ethnic group in both villages appears to have been Irish while those in the center of Southborough were primarily of British descent.

Growth slowed in the Early Modern period. At this time, the village of Southville began to outstrip Cordaville in terms of industrial and commercial activity. The mills in Cordaville were out of operation from 1926 until 1928. Also, subsequent to the turn of the twentieth century, there was only one retail store serving the village of Cordaville. Commercial and industrial activity continued to slow during the mid twentieth century and the buildings that housed the mills were demolished in the 1970s. The village retains almost all the Early Industrial period housing on Parker, Southville, and Cottage streets. The former Wright store at 110 Southville Road continues in operation.

The remains of the industrial complex south of the railroad are visible above ground level. Several foundations, elevated roads and at least two small cut-stone bridges remain from the Early Industrial period. The larger is built of cut and uncut stone with an arch approximately 10' in height and 15' in width. The smaller bridge rises 2' above the mudline and is 8' wide. It is built of cut granite. The site is likely to yield archaeological information concerning the history of milling operations of the period.

Statement of significance by: Sanford Johnson

The criteria that are checked in the above sections must be justified here.

The area of Cordaville in Southborough is eligible for the National Register of Historic Places because it retains integrity of location, design, workmanship, feeling and association. The clusters of worker housing represent a significant collection of Early and Late Industrial residential architecture built in connection with industrial and commercial operations in the village. There are several examples that retain integrity of materials, which further recommends the area for eligibility. Although some important buildings have been demolished, the village currently displays a level of density commensurate with its appearance in the Early Industrial Period. The mills around which the houses were constructed have been removed, but there is greater potential to gain information through archaeological investigation. The village appears to meet criteria A and C of the National Register at the local level for its association with broad patterns of industrial history and its embodiment of distinctive characteristics of worker housing. Although it is composed of a variety of resource types, the area is a unified entity by virtue of its common industrial associations, its clearly defined periods of construction and the relatively small number of intrusions. All surveyed properties were present during the period of operation of the mills. Also, the vast majority of surveyed properties were built during the Early and Late Industrial periods, which contributes to the cohesive appearance of the neighborhood. New construction is limited to fewer than ten residences, which detract little from the historic associations of the area.

MASS. HIST. COMM

DATE: MAY 2000 - Southborough Historic Resource Survey - S & P Grant - FY 2000

RECORDED BY: Schuler/Forbes

The following information is to be added to the existing Cordaville Area Form dated 1995 and does not necessarily apply to the National Register Criteria Statement. This information expands the Cordaville Area Form only. The attached Area Data Sheet includes all properties in the previously described Area Form as well as those in the expanded areas for the purposes of this amendment to the Cordaville Area Form. Many dates, names and styles have been changed on the area data sheet to reflect information found on the 1856 and 1857 historic maps as well as field analysis. Individual building forms exist for three of the properties that have been added but were included in the 1971 Southville Area Form according to the MHC Marcis Index for Southborough. The **South Union School**, 21 Highland Street and **St. Matthew's Church** at 105 Southville Road were included in the Southville Area Form completed in 1971 but not the update. Each institution straddles Cordaville and Southville and were built to serve each village, thus individual forms have been completed for each and they are included in the area data sheet for Southville simply to be consistent with former MHC numbering. However, it is important to consider them when reviewing the development patterns of Cordaville.

ARCHITECTURAL DESCRIPTION

☒ see continuation sheet

The boundaries of the area are expanded to include properties north on Cordaville Road and a small part of Woodland Road, which were developed as the village of Cordaville expanded. It includes a number of properties that were previously surveyed and that are located in the village of Cordaville. The boundaries of the village area extend farther east along Southville Road to a point at which the building fabric changes to post 1950s. Properties along Cordaville and Woodland Roads represent late nineteenth century and early twentieth century expansion of residential development north of the railroad. Dwellings range from modest one and one-half story bungalows to two and one-half story gable front buildings with little or no architectural elaboration. Most are on brick or concrete foundations and in many instances clapboards and shingles have been covered with asbestos shingles or vinyl siding. There is at least one commercial property in this expansion. At the apex of Cordaville and Woodland Roads is a barn-like structure with an attached brick office that has been a gas station since 1942, known as 264 Cordaville Road. On the west end of Cordaville the earliest known remaining house in Cordaville is a modest side gable roof cottage built into the slope of the land with a dry-laid foundation/retaining wall, known as the **T. Manning House** at 103 Southville Road. It is the oldest extant dwelling in the village dating from ca. 1825, which precedes the railroad development of the area. Three mid-nineteenth century gable front dwellings are located at 4 North Street, 197 Woodland Road and 272 Cordaville Road. Each was constructed on a granite foundation and displays a sidehall plan. Early twentieth century substantial houses are the Colonial

ARCHITECTURAL DESCRIPTION (Continued)

Revival hipped roof dwellings at 193 Woodland Road and 259 Cordaville Road. They rest on high rubble stone foundations and have wood clapboard and shingle siding. One example of an unaltered bungalow is found at 261 Cordaville Road. The house is nearly square, has a broad hipped roof, hipped dormers on the side elevations, and strings of three windows flanking the centered entrance.

HISTORICAL STATEMENT

☒ *see continuation sheet*

Several of the dates of construction for properties in the existing area form and this expanded area form have been changed to coincide with map evidence from 1856 and 1857. This expansion of the Cordaville Area Form includes late nineteenth century and early to mid-twentieth century development of this once thriving mill village. The actual division of Cordaville and Southville is somewhat arbitrary as is evidenced by the **St. Matthew's Parish**. In 1886 the first priest was appointed Pastor of Cordaville serving Cordaville, Southville and Fayville. The church construction was between the cores of the two villages of Cordaville and Southville and started as a mission church for both villages. When it became a parish it was to serve all four villages of Southborough: Cordaville, Fayville, Southville and Southborough Center. This Catholic Parish was established for the Irish population that had come to Cordaville and Southville to work on the railroad and in the mills.

Each of the two villages, Cordaville and Southville, also had its own school until they were consolidated into the **Southville Union School** on 21 Highland Street in 1913. The Catholic Church and the Union School, both built to serve both villages continue as a divider and a link between the two villages. The **Cordaville School** was located at 193 Woodland Road from the 1850s. The existing Four Square dwelling at that site replaced the schoolhouse.

The earliest surviving house in the village is the Thomas Manning House so named for its ca. 1870s owner. The house appeared in this approximately location on the 1856 map and possibly on the 1831 map. Only one house is shown in Cordaville on the 1831 map. In the 1850s nearly every property along Southville Road was owned by Cordaville Mills or O. S. Sanford, those who established the industrial center at Cordaville. The six Gothic Revival cottages at 65, 67, 69, 71, 73, and 75 Southville Road were built by **Philo Sanford** of the Sanford mills as workers' cottages and five appear on the 1856 map. Each property shared a well with an adjacent property and each was conveyed with the water rights to the shared well. The house at 73 Southville Road was conveyed to Dexter and Curtis Newton in the early 1860s by Philo Sanford. 75 Southville Road was conveyed by Sanford to F.A. Dorr in 1864. The Greek Revival sidehall entrance house that sits back from the road at 272 Cordaville Road was first owned by **George O. Wilson** (b. ca. 1821) who married Catharine A. Onthank in 1845. In 1850 his father Gilbert D. Wilson had a twenty-acre farm which may have been at this location. The dwelling at 197 Woodland Road historically has been known as the Mixer House and does appear on the 1857 map with the

HISTORICAL STATEMENT (Continued)

name **R. Mixer** listed. By 1870 only one Mixer was assessed in Southborough, Elizabeth Mixer for a modest house on ½ acre of land.

Expansion into the 1900s north of the railroad accommodated the continuously growing population due to the Cordaville Woolen Company which operated from 1876 to 1926 on the edge of Southville Road at Cordaville Road and adjacent to the Boston & Albany Railroad. Company owned property was identified in the 1928 Auction brochure that described the "Entire Holdings Real Estate, Machinery, Equipment of the Cordaville Woolen Co., Cordaville Mass., a Manufacturing Plant of Moderate Size on the Main Line of the Boston & Albany Railroad." Even by that late date the company owned two brick buildings, no longer extant, other commercial buildings, thirteen dwelling properties, barns, storehouses, and others. The two tenements at 114 and 116 Southville Road were described in detail. Four family dwellings of four rooms each were located in the tenement at 114 Southville Road and two dwellings - one of five rooms and one of nine rooms - in the tenement at 116 Southville Road. The house at 272 Cordaville Road also was shown on the map.

LEVEL: X Local State National

STATEMENT OF SIGNIFICANCE by Betsy Friedberg

The former mill village of Cordaville includes clusters of worker housing representing a significance collection of Early and Late Industrial residential architecture built in connection with industrial and commercial operations in the village. Manufacturing--primarily of woolen cloth--commenced here in the 1830s in response to the construction of the B&A Railroad; the first actual mill here was erected in 1846 and continued in various guises until the 1930s. A variety of properties associated with manufacturing enterprises survives here, including Greek Revival-style and Gothic Revival cottages, three multifamily houses, and a company store. For its associations with a significant community centered around a major industrial enterprise, and for its well preserved examples of worker housing and associated buildings of the mid to late 19th century, the district meets NR Criteria A and C. The mills around which the houses were constructed have been removed, but it is possible that the area of the mills retains sufficient integrity as an archaeological site to warrant nomination under Criterion D. Ten new buildings are mentioned in the text of the area form but are not identified on the map or district data sheet; a nomination for this district would have to assess the impact of new construction upon the district and its boundaries. Also, the area form does not include a verbal boundary justification, and does not identify what lies outside of the identified area north of Southville Road.

FRAMINGHAM (cont.)

The following properties are ineligible for National Register listing:

Angier Company Building, 50 Fountain Street
 R.H. Long Car Showroom, 635 Waverly Street
 Residence, 949 Waverly Street
 Residence, 997 Waverly Street
 Residence, 1007 Waverly Street
 Residence, 1015 Waverly Street
 Residence, 1035 Waverly Street
 Residence, 1045 Waverly Street
 Residence, 1051 Waverly Street

ASHLAND

The Tilton Avenue/Cherry Street Area is eligible for National Register listing as part of a larger Ashland Center historic district.

The Kane/Ward Farmhouse, 34 Fountain Street, is individually eligible for National Register listing as a well-preserved example of a mid-19th century farmhouse with attached barn.

The former Telechron Watch Company, constructed in 1927 at 50 Homer Street is eligible for individual listing in the National Register as the only Moderne Style building in Ashland.

The following properties are ineligible for National Register listing:

Highway Department Garage, 80 Cherry Street
 Cloyes Farm, 2-4 High Street
 Residence, 15 Metcalf Street
 C.H. Tilton Shoe Factory, 60 Pleasant Street
 Saving Spring Company, 280 Pleasant Street
 Commercial/Professional Complex, 360 Pleasant Street
 Beckongreen Garden Center, 18 Waverly Street

SOUTHBOROUGH

The two mill villages of Cordaville and Southville, which developed in the mid-1800s in response to the 1830s construction of the Boston & Albany Railroad, are eligible for National Register listing. Although the mills at Cordaville are no longer extant, the community retains a significant collection of Early and Late Industrial residential architecture associated with industrial and commercial operations in the village.

The village of Southville also retains a diverse collection of housing stock constructed in the mid and late 19th century in association with no longer extant boot and shoe factories, woolen and cotton mills, and a grist mill. In addition to the residences, the village also contains a church, former railroad depot, and community hall. Historical archaeological deposits at Cordaville and Southville may retain sufficient integrity as archaeological sites to be found eligible under Criterion D. MHC staff expects that additional information will be forthcoming as the result of archaeological investigations being undertaken.

RE: Cultural Resources Survey, Worcester Commuter Rail Extension Project; MHC #9415

Dear Ms. Parcon:

Staff of the Massachusetts Historical Commission have reviewed Volume II, "Historic Properties Survey For the Right-of-Way of the Worcester Commuter Rail Extension" which was submitted to this office together with original Area, Building, and Structure Forms. Please have two (2) additional copies of the final Volume II report submitted to the MHC to complete our files.

In general, the report is well-organized and comprehensive and MHC staff concur with the majority of the consultant's eligibility determinations for listing in the National Register of Historic Places and recommendations for further research. However, MHC staff do not agree that the right-of-way for the commuter rail extension constitutes a National Register-eligible entity; a fragment of the larger Boston & Worcester Railroad line, it retains insufficient integrity as an eligible property in its own right. After review and evaluation of this information, MHC staff have the following comments.

FRAMINGHAM

MHC staff concur that Lloyd's Diner (aka Worcester Lunch Car No. 749), 156 Fountain Street, is individually eligible for National Register listing.

The Fountain Street Area, a comparatively well-preserved complex of manufacturing and support buildings associated with the shoe, textiles, leather, and auto body manufacturing enterprises of Richard H. Long in the early 20th century, is National Register eligible.

The former Gossamer Rubber Company, 885 Waverly Street, appears to be eligible for listing for its associations with one of the oldest and largest rubber clothing manufacturers in the United States in the late 19th century; however, if National Register listing were to be pursued, additional information on construction dates and the physical development of the complex would be required.

WESTBOROUGH

The properties at 25, 27, and 46 High Street Extension, 11, 13, and 15 State Street, 38, 43, and 49 Water Street, and 20 Willow Street are eligible for National Register listing as an extension of the existing West Main Street Historic District.

The Eliezer Rice House, 37 Maynard Street, is individually eligible for National Register listing as a remarkably well-preserved example of a circa 1830 Federal Style farmhouse with an earlier circa 1730 rear ell, and for its associations with Eliezer Rice, an early settler of Westborough.

The following properties are ineligible for National Register listing:

Corrugated Paper, 111 Milk Street
Bay State Abrasives, Union Street

GRAFTON

The Westborough Road Area, a grouping of moderately intact circa 1870 to 1900 single-family residences, appears to be eligible for National Register listing; however, if National Register listing were to be pursued, additional information would be required regarding the area's association with the nearby J.S. Nelson shoe factory.

The Wyman-Gordon Company Building, 244 Worcester Street, is not eligible for listing.

WORCESTER

The East Worcester Street Area is eligible for listing in the National Register as a well-preserved complex of industrial and public-works buildings associated with the late 19th and early 20th century development of the City of Worcester.

The following properties are ineligible for National Register listing:

Industrial Building, 1451 Grafton Street
Residence, 5 Hecla Street
Residence, 34 Nathaniel Street
White, Peavy & Dexter Co., Building, Putnam Lane
Industrial Building, 383 Shrewsbury Street

BRIDGES

The following bridges are individually eligible for listing in the National Register:

Ashland- Conrail over Stream (Boston & Albany Railroad Bridge No. 26.35)
Conrail over Sudbury River (Boston & Albany Railroad Bridge No. 23.54)

Southborough- Conrail over Ash Stream (Boston & Albany Railroad Bridge No. 27.29); also considered a contributing element in the Cordaville Historic Area

Westborough- Conrail over Millpond (Boston & Albany Railroad Bridge No. 33.12)

The following bridges in Southborough are not individually eligible for National Register listing, but are considered eligible as contributing elements in the Cordaville Historic Area:

Conrail over Pedestrian Underpass (Boston & Albany Railroad Bridge No. 27.47)
Conrail over Route 85 (Boston & Albany Railroad Bridge No. 27.34)

The following bridges are ineligible for National Register Listing:

Ashland- Conrail over Indian Brook (Boston & Albany Railroad Bridge No. 25.84)
Conrail over Sudbury River (Boston & Albany Railroad Bridge No. 23.83)

Westborough- Conrail over Arch Street (Boston & Albany Railroad Bridge No. 34.73)
Conrail over East Main Street (Boston & Albany Railroad Bridge No. 31.99)
Fruit Street over Conrail (Boston & Albany Railroad Bridge No. 28.92)
Conrail over Maynard Street (Boston & Albany Railroad Bridge No. 33.18)
Conrail over Millpond (Boston & Albany Railroad Bridge No. 33.12)
Conrail over Water Street (Boston & Albany Railroad Bridge No. 32.22)

Grafton- Conrail over Blackstone River (Boston & Albany Railroad Bridge No. 38.24)
Conrail over Pedestrian Subway (Boston & Albany Railroad Bridge No. 37.82)
Conrail over Shrewsbury Street (Boston & Albany Railroad Bridge No. 37.90)

Worcester- Conrail over Putnam Avenue (Boston & Albany Railroad Bridge No. 43.31)
Conrail over Route 20 (Boston & Albany Railroad Bridge No. 39.92)
Conrail over Sunderland Road (Boston & Albany Railroad Bridge No. 40.23)
Conrail over Seasonal Stream (Boston & Albany Railroad Bridge No. 41.89)

Finally, MHC staff look forward to reviewing Volume IV on the Ashland, Southborough, and Westborough stations, and consulting on ways to avoid, minimize, or mitigate adverse effects to any significant historic or archaeological resources that may be affected by the project.

These comments are provided to assist in compliance with Section 106 of the National Historic Preservation Act of 1966, as amended (36 CFR 800), Massachusetts General Laws, Chapter 9, Sec. 26-27c, as amended by Chapter 254 of the Acts of 1988 (950 CMR 71), MEPA (301 CMR 11), and the terms of the Process Memorandum of Agreement for this project.

If you have additional questions, please contact Allen Johnson or Edward L. Bell of this office.

Sincerely,

Judith B. McDonough
